LEAD IN DRINKING WATER REPORT

Performed At:

Schools of Monroe Township, NJ
Administration Building (BOE), and Transportation department,
Applegarth Elementary School, Barclay Brook School,
Brookside Elementary School, and Trailers, Field House,
Monroe High School, Monroe Middle School, Mill Lake School,
Mill Lake Auxiliary School, Oak Tree School, Woodland Elementary School.

Performed For:

Monroe Township Board of Education
Att: Jerry Tague
423 Buckelew Avenue
Monroe Township, New Jersey 08831

Introduction

LEW Corporation was contracted by Monroe Township Board of Education to test for the presence of lead in drinking water in nine schools in the district, the field house, and Administration office (BOE) and the transportation department.

Sampling Methodology

LEW Corporation followed the July 13, 2016 amendments to NJAC 6A:26. Full details on sampling practices can be found in Districts Sampling Plan.

All samples were collected in 250mL wide mouth plastic containers that was prepackaged by the analytical laboratory. The sample containers may contain nitric acid, if expedited analysis is required. If not, nitric acid will be added to each sample upon arrival at the laboratory. At each sample location, the first draw sample was taken after it was determined that the water had been standing in the plumbing system for greater than eight hours but less than forty-eight hours. If second draw samples were collected, they were collecting following a flushing protocol outlined in the District's Sampling Plan.

Drinking Water Results

On April 18-22, 2022 LEW Corporation collected the following number of water samples:

Administration Building (BOE) & transportation Bldg

- 3 first draw samples collected
- 0 samples above the 15ppb action level

Applegarth Elementary School

- 18 first draw samples collected + 1 quality control
- 0 samples above the 15ppb action level

Barclay Brook School

- 22 first draw samples collected + 1 quality control
- 2 samples above the 15ppb action level

Brookside Elementary School

- 40 first draw samples collected + 1 quality control
- 0 samples above the 15ppb action level

Field House

- 6 first draw samples collected
- 0 samples above the 15ppb action level

Monroe High School

- 119 first draw samples collected + 1 quality control
- 1 samples above the 15ppb action level

Monroe Middle School & Middle School Trailers

- 45 first draw samples collected + 1 quality control
- 2 samples above the 15ppb action level

Mill Lake School

- 51 first draw samples collected + 1 quality control
- 0 samples above the 15ppb action level

Mill Lake Auxiliary School

- 5 first draw samples collected
- 1 samples above the 15ppb action level

Oak Tree School

- 51 first draw samples collected + 1 quality control
- 3 samples above the 15ppb action level

Woodland Elementary School

- 25 first draw samples collected + 1 quality control
- 0 samples above the 15ppb action level

The complete list of samples that exceeded the 15ppb limit can be found in Appendix A. The complete list of all sample results can be found in Appendix C. The laboratory results can be found in Appendix E.

Certain outlets could not or were not tested due to various reasons. The following table lists those locations and the reason why samples were not collected.

School	Sample Location	Reason for not testing.
Applegarth Elementary School	Nurse office ice machine (13)	Not potable source
Applegarth Elementary School	Hall by Art (16)	Disconnected
Applegarth Elementary School	Hall by 8 (21)	Not functioning
School	Sample Location	Reason for not testing.
Barclay Brook School	Hall by 109 Bubbler (9)	Removed
Barclay Brook School	Room 103 Sink (14)	Removed
Barclay Brook School	Room 102 Bubbler (15)	Removed
Barclay Brook School	Room 102 Sink (16)	Removed
Barclay Brook School	Room 101 Bubbler (17)	Removed
Barclay Brook School	Room 208 Bubbler (27)	Removed
School	Sample Location	Reason for not testing.
Monroe Middle School	Hall by 124 Bubbler (12)	Not functioning
Monroe Middle School	Room 132 Sink (14)	Not a potable source
Monroe Middle School	Room 146 ice machine (20)	Disconnected
Monroe Middle School	Girls Locker (24)	Bathroom sinks not potable
Monroe Middle School	Girls Locker (25)	Bathroom sinks not potable
Monroe Middle School	Room 161 (27)	Room locked not accessible
Monroe Middle School	Hall by 241 (43)	Not functioning
School	Sample Location	Reason for not testing.
Monroe High School	Room J116 Sink (74)	Removed
Monroe High School	Room H 103 Sink (79)	Art room not potable
School	Sample Location	Reason for not testing.
Mill Lake School	Room 414 Sink (18)	Bathroom sink not potable
School	Sample Location	Reason for not testing.
Oak Street School	Nurse Office Ice Machine (41)	Removed
School	Sample Location	Reason for not testing.
Woodland Elementary School	Hall by 115 Bubbler (3)	Removed
Woodland Elementary School	Room 120 Bubbler (6)	Not present
Woodland Elementary School	Room 114 Sink (8)	Storage Room
Woodland Elementary School	Room 138 Sink (12)	Removed
Woodland Elementary School	Nurse Office Ice Machine (27)	Not potable source

Recommendations

Those outlets where the first draw sample tested below 15ppb are not considered to be elevated and no mitigation is necessary.

For those outlets where the first draw sample exceeds 15ppb the following steps are recommended:

- 1) Immediately discontinue use of the outlets.
- 2) Conduct second draw (flush) samples on these outlets to further delineate source of contamination.

A complete list of recommendations per outlet can be found in Appendix B.

Additional Recommendations

- 1) Follow-up samples should be collected after any remediation efforts in order to determine the efficacy of the work.
- 2) Any of the inoperable/non-functioning outlets listed above that are brought back into service should be sample.
- 3) Comply with all requirements set forth in NJAC 6A:26.

Appendix A Exceedances

Building	Sample ID	Location	Concentration (ug/L) Or ppb
Barclay Brook School	1	KITCHEN SINK K1	315
Barclay Brook School	2	KITCHEN SINK K2	242

Sample Results denoted with a "less than" (<) sign contain less than the reporting limit which is 1 ppb.

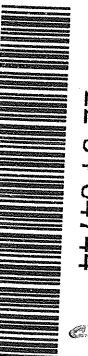

The EPA Maximum Contaminant Level for Lead in Drinking Water is 15 ppb. The results herein conform to NELAC standards, where applicable, unless otherwise narrated on this report. Results represent the analysis of samples submitted by the client. Sample location, description, field parameter results, etc., were provided by the client. This report cannot be reproduced, except in full, without written approval from Environmental Hazards Services, L.L.C.

Sample Results denoted with a "less than" (<) sign contain less than the reporting limit which is 1 ppb.

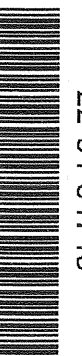

The EPA Maximum Contaminant Level for Lead in Drinking Water is 15 ppb. The results herein conform to NELAC standards, where applicable, unless otherwise narrated on this report. Results represent the analysis of samples submitted by the client. Sample location, description, field parameter results, etc., were provided by the client. This report cannot be reproduced, except in full, without written approval from Environmental Hazards Services, L.L.C.

LEGEND ug/L= micrograms per liter ppb = parts per billion

Sample Results denoted with a "less than" (<) sign contain less than the reporting limit which is 1 ppb.

The EPA Maximum Contaminant Level for Lead in Drinking Water is 15 ppb. The results herein conform to NELAC standards, where applicable, unless otherwise narrated on this report. Results represent the analysis of samples submitted by the client. Sample location, description, field parameter results, etc., were provided by the client. This report cannot be reproduced, except in full, without written approval from Environmental Hazards Services, L.L.C.

LEGEND ug/L= micrograms per liter ppb = parts per billion

Sample Results denoted with a "less than" (<) sign contain less than the reporting limit which is 1 ppb.

The EPA Maximum Contaminant Level for Lead in Drinking Water is 15 ppb. The results herein conform to NELAC standards, where applicable, unless otherwise narrated on this report. Results represent the analysis of samples submitted by the client. Sample location, description, field parameter results, etc., were provided by the client. This report cannot be reproduced, except in full, without written approval from Environmental Hazards Services, L.L.C.

LEGEND ug/L= micrograms per liter ppb = parts per billion
