eBook Registration for Honors Bio Textbook (Audesirk 10th ed)

To fully utilize the textbook resources, you must first register with Pearson and set up a class.

1. Go to MasteringBiology.com

2. Click Instructors under Register (Green box) and select “Yes I am ready to register”

3. Accept Terms.
4. Select “No” under “Do you have a Pearson Education Account” and fill out the required information.

5. The access code will be/has been provided to you by Danielle.

6. Before proceeding, make sure the textbook title is correct. Top line should read as below “Mastering Biology for Audeskirk, Biology: Life on Earth, 10E w/eText. For school name, select “Other” from drop down menu and type in the name of the school.
7. Log in to the Mastering Biology Site.

8. Create a new course.

9. Give the course a good title that you can remember and identify. MrOBlock1B for example. Double check that the textbook is correct. You will need to enter an end date. The last day of school is June 20th.
10. Optional setting for student IDs. This can be modified later.

11. Give the course an ID. This is what the students will enter to join your class, so make it easy to tell them. The default ID is awful, so I highly recommend changing it.

12. I would recommend adding the assignments. Even if you don’t plan on using them, it is probably a good idea to have them there and ready to go.

13. This is your course home screen. From here you can access the eText and all the instructor resources.
