

Good Afternoon Monroe Township Community,

Watching the news and events surrounding Mr. Floyd's tragic death over the past several days has been a lot for many of us to process, especially during this period of isolation. Cities within every state are dealing with racially charged anger and protests for equal justice and equal rights, a clear sign that racism and discrimination can no longer be tolerated. As educators it is our duty to inform and encourage students to accept differences, and value the strengths of different cultures and backgrounds, not fear or discriminate against them. Monroe Township Schools deliver a diverse and culturally sensitive curriculum for its students, and we also implement the same cultural values and responsiveness in the administration, faculty, and staff.

To assist parents in addressing these issues with their children, I have asked Dr. Critelli to work with our guidance department to provide resources which you will find attached to this email. As always, our administrators, guidance department and teachers are also available for students and parents.

I am proud to be a part of a school district that values and accepts our differences, and I ask you to join me in continuing to celebrate our diversity.

Thank you,

Dr. Alvich
Superintendent of Schools
