Monroe Township IT Department

A message from MONROE TWP

Good afternoon,

Last evening, we were notified by OEM that a HS student tested positive. The student is full remote and has not been in school.

A parent reported that a student at BB tested positive. The student is full remote and has not been in school.

A student at Woodland tested positive today. The student was in school 11/30. All contacts have been notified to quarantine for 14 days.

The district continues to work with the Middlesex County Department of Health on every case and exposure. I want to remind everyone that immediate self-reporting of any positive case or potential exposure is critical for the district to maintain the safety of all. It is also imperative that we continue to follow all protocols for frequent hand washing, face coverings, and social distancing.

Thank you.
